

STREAMLINE HEAVY-DUTY PHASING

SHP Series

The **STREAMLINE HEAVY-DUTY PHASING CYLINDER**, or **SHP** is based on the **SLP** design and benefits from the same design features but is fitted with larger rods for heavy duty applications. The cylinders are available in 1/2" increments to form synchronised sets. The unique valve design allows for re-phasing of cylinders at either end of their stroke.

NB: To complete the part number, replace ** with the stroke length, i.e. 8" = 08.
